OBJECTIVE

Full Stack developer experienced in JavaScript, proficient in building dynamic and responsive user interfaces. Skilled in integrating front-end components with server-side technologies using Node.js and Express. Experienced in working with databases like PostgreSQL and MongoDB for seamless data interaction. Strong foundation in data structures, algorithms, OOP, and networking, with proficiency in Git and Linux environments. Effective communicator in both Arabic and English, capable of collaborating within diverse and dynamic teams to deliver high-quality, user-centric solutions.

EDUCATION

Bachelor's Degree at the Faculty of Computer Science and AI
Medical Informatics Department - Damietta University
Overall grade: Excellent

WORK EXPERIENCE

- **National Telecommunication Institute (NTI)** Aug 2024 - Sept 2024
Mean Stack Web Development Internship
- **Baianat Company** Aug 2024 - Sept 2024
Web Development
- **Big Data Analytics summer internship** July 2024 - Aug 2024
Data Analyst
- **ALX Africa** Sept 2022 - May 2023
Software Engineer

PROJECTS

- **Natours – Full Stack Project - [Github Link](#)**

A comprehensive full-stack tourism platform showcasing modern design principles and responsive layouts, utilizing **Node.js**, **Express**, and **MongoDB**. The platform includes authentication and role-based access control, **CRUD operations**, secure bookings with Stripe payments. It features robust security measures like rate limiting, data sanitization, and password hashing.

- **Secure User Authentication System – Full Stack Project – [Github Link](#)**

A modern full-stack authentication system built with **Node.js**, **Express**, and **MongoDB**, demonstrating my ability to build secure and interactive web applications end-to-end. The system features user registration with email verification, protected routes, and session management. I also designed and developed the **frontend interface** using **Pug**, **CSS3**, and **JavaScript (ES6+)**, creating a clean, responsive UI with animated alerts. This project highlights seamless integration between backend logic and frontend views, delivering a smooth user experience across authentication flows.

SKILLS

- | | |
|---------------------------------------|--------------------|
| • Data structures and Problem Solving | • Postgress |
| • Object-Oriented Programming (OOP) | • MongoDB |
| • Proficiency in Python | • Javascript (ES6) |
| • HTML / HTML5 | • Typescript |
| • CSS | • Node.js |
| • RESTful APIs | • Express.js |
| • Angular | |

PERSONAL SKILLS

- Adaptable team collaborator.
- Receptive and eager to learn.
- Meticulous approach to coding, with a keen eye for detail to ensure error-free implementation and adherence to coding standards
- Resilient work ethic with the capacity to thrive in high-pressure environments.
- Exceptional communication abilities and effective time management skills.

LANGUAGE SKILLS

English – Fluent in written and spoken

Arabic – Native
